

PROFESSIONAL SUMMARY

Frontend-focused Full-Stack Developer with 5 years of experience designing and delivering responsive, high-performance web applications using React, Next.js, TypeScript, JavaScript, HTML5, CSS3 and Tailwind CSS, backed by working proficiency across Node.js/NestJS/Laravel APIs and PostgreSQL/MongoDB/MySQL data layers. Strong in reusable component architecture, server-side rendering, responsive and mobile-first design, API and third-party integration, accessibility and scalable data-heavy interfaces, with the backend depth to own features end-to-end. Delivered payment platforms processing approximately 400K USDT daily, dashboards with 15K+ records, multilingual customer experiences, mobile applications and enterprise operational tools. Experienced collaborating with UX/UI designers and cross-functional teams, mentoring developers, conducting code reviews, defining frontend standards and owning features from requirements through production release.

PROFESSIONAL EXPERIENCE

AIO Technology LLC, *Frontend-Focused Full-Stack Developer*

Dubai, UAE · Jun 2025 – Present

- Own delivery of responsive React/Next.js payment experiences and internal operational platforms using TypeScript, JavaScript, HTML5, CSS3, Tailwind CSS, ShadCN UI, Redux Toolkit and reusable component architecture.
- Build transaction, balance, reporting, webhook, API-key, sub-user, IP-whitelist, TOTP and security workflows supporting 15K+ records and approximately 400K USDT in daily transaction volume.
- Optimize speed and scalability through server-side pagination, optimized polling and caching, memoization, lazy loading, controlled re-rendering, bundle-conscious architecture and resilient loading, failure and retry states.
- Deliver multilingual interfaces and responsive desktop/mobile experiences; integrate REST services for payments, authentication, reporting, callbacks and account management.
- Collaborate with UX/UI designers, product owners, backend engineers, QA and business teams to define features, translate designs and requirements into seamless interfaces, review code, troubleshoot production issues and own delivery through release.

United Future Connections DMCC, *Frontend-Focused Full-Stack Developer*

Dubai, UAE · May 2024 – Jul 2025

- Developed and maintained responsive React customer applications and data-heavy dashboards, integrating Node.js/Laravel APIs, MongoDB data, payment services and wallet providers across complex user journeys.
- Built a React crypto-card application covering application, account and crypto top-up flows, and developed the companion React Native/Expo mobile experience.
- Supported Web3 functionality across EVM and Tron ecosystems using Ethers.js, Wagmi, Viem, WalletConnect, MetaMask, TronWeb, token standards and QR-based payment flows.
- Maintained multiple company products alongside the core payment and card platforms, improving responsive behaviour, cross-browser quality, performance, UI consistency and production reliability.

Kaizen Global, *Full Stack Developer*

Islamabad, Pakistan · Aug 2022 – Apr 2024

- Architected and built full-stack applications from scratch using React, Next.js, Node.js, Express.js and MongoDB across dashboards, marketplaces, SaaS portals and client products.
- Developed Laravel applications across both frontend and backend layers, implementing user interfaces, business logic, REST APIs, authentication, MySQL data workflows and third-party integrations.
- Delivered full-stack blockchain applications across React/Next.js frontends, Node.js/backend services and Solidity smart contracts, including wallet connectivity, on-chain transactions, token/NFT functionality and Web3 integrations.
- Delivered authentication, REST APIs, database models, CRUD workflows, third-party integrations, real-time data and responsive customer/admin interfaces.
- Balanced rapid MVP delivery with maintainable architecture, reusable components, structured APIs, performance, security and cross-browser quality.
- Mentored junior developers, conducted peer code reviews and promoted reusable architecture, clean code, frontend standards, performance practices and consistent team delivery.
- Gathered requirements directly from technical and non-technical clients, converted business goals into implementation plans and shipped production solutions with limited design support.

- Built responsive interfaces using JavaScript, React, HTML5, CSS3 and WordPress, then expanded into Laravel-backed and full-stack JavaScript projects.
- Implemented reusable UI components, API integrations, forms, authentication and client-requested features while strengthening Git, debugging and delivery practices.

SELECTED PROJECTS

AIO Payment Platform and Operations Dashboard

Next.js, React, TypeScript, Tailwind CSS, ShadCN UI, Redux Toolkit, Recharts, REST APIs, Node.js/Laravel, MongoDB

- Built customer and operations workflows for deposits, withdrawals, swaps, transactions, balances, reports, callbacks, API keys, webhooks, sub-users, notifications and security. Scaled data-heavy screens beyond 15K records through server-side pagination, optimized polling/caching and memoization while supporting approximately 400K USDT daily volume.

AIO Crypto Card — Web and Mobile

React, React Native, Expo, REST APIs, wallet/payment integrations

- Developed web and mobile experiences allowing users to apply for a crypto card, manage the account and top up using cryptocurrency. Owned responsive interfaces and backend integration across core customer journeys.

AgencyOS — Multi-tenant Digital Agency CRM

Next.js 16, React 19, TypeScript, NestJS, Prisma 7, PostgreSQL, Redis, BullMQ, Socket.IO, pnpm, Turborepo, Docker

- Designed a multi-tenant CRM covering JWT authentication and refresh rotation, RBAC, staff sessions, leads, duplicate detection, response-time tracking, clients, proposals, projects, change requests, invoices, payments, profitability, retainers, commissions, approvals, audit history, multi-currency, analytics, scheduled reports and CSV/Excel exports. Integrated Meta Lead Ads, WhatsApp Business Cloud API and SMTP through webhooks and background jobs.

FinSight AI — Finance CRM and Operations Platform

Next.js 15, NestJS, PostgreSQL, Prisma, Redis, Socket.IO, Docker, OpenRouter AI, TanStack Query, ShadCN UI

- Built a production-style finance CRM with JWT/refresh authentication, RBAC, client management, KYC workflows, transaction approvals, audit trails, support tickets, real-time notifications, AI ticket summarization, reply generation, client risk analysis and dashboard Q&A. Added rate limiting, security hardening and production Docker architecture.

MERN and Web3 Marketplaces / SaaS Products

React, Next.js, Node.js, Express.js, Laravel, MongoDB, MySQL, Solidity, Ethers.js, Wagmi, Viem, WalletConnect, MetaMask, Moralis, Infura, IPFS

- Delivered 5+ live full-stack/MERN, Laravel and Next.js products within a broader portfolio of company and client work. Built marketplaces, dashboards, admin portals and API-driven MVPs spanning frontend interfaces, backend services, database models and Solidity smart contracts, with wallet connectivity, on-chain transactions, token/NFT standards and third-party Web3 integrations.

Best Wing Global — Multilingual Financial Website

WordPress, PHP 8.3, MariaDB, Apache, AWS EC2, CloudFront, TranslatePress

- Developed and maintained a multilingual financial-services website and content architecture across markets, accounts, education, legal, promotions, analysis and copy-trading sections. Managed AWS hosting, CDN delivery, performance tuning, backups, malware remediation, DNS updates and contact-form operations.

TECHNICAL SKILLS

Frontend: React, Next.js 16/App Router, server-side rendering, React 19, TypeScript, JavaScript ES6+, HTML5, CSS3, Tailwind CSS, ShadCN UI, Base UI, Radix UI, Redux Toolkit, Zustand, Context API, TanStack Query v5, React Hook Form, Zod, Recharts, reusable component libraries, responsive/mobile-first UI, accessibility, cross-browser development and technical SEO

Backend and APIs: Node.js, Express.js, NestJS, Laravel, PHP, modular architecture, dependency injection, guards, class-validator DTOs, REST API design, Route Handlers, webhooks, BullMQ, Socket.IO, JWT, OAuth 2.0, RBAC, refresh-token rotation/mutex patterns and GraphQL

Data: PostgreSQL, Prisma ORM, migrations, transactions, schema design, MySQL, MongoDB, Redis, SQL/NoSQL modelling, indexing, query optimization, caching and audit trails

Testing and Quality: Vitest, Jest, React Testing Library, unit testing, integration testing, debugging, Chrome DevTools, performance profiling, lazy loading, memoization, code splitting, code review, error handling and secure development

AWS Development: IAM, Lambda, API Gateway, S3, DynamoDB, RDS/Aurora, SQS, SNS, EventBridge, Step Functions, ECS, Elastic Beanstalk, CloudFront, Route 53, Cognito, Secrets Manager, KMS, CloudWatch, X-Ray, CloudFormation, AWS SAM, CodeBuild, CodeDeploy and CodePipeline

Cloud and Tooling: AWS EC2, Docker, Docker Compose, CI/CD, Git, GitHub, GitLab, pnpm workspaces, Turborepo, Vite, Turbopack, Netlify, Azure and AI-assisted development with Codex, Claude Code and Cursor

Web3 and Mobile: React Native, Expo, Solidity smart contracts, Ethers.js, Wagmi v2, Viem, WalletConnect, MetaMask, TronWeb, Reown AppKit, ERC-20/721/1155, Solana Phantom/SPL, EIP-681/BIP-21 payments, Moralis, Infura and IPFS

EDUCATION

PMAS University, Rawalpindi, Pakistan

Bachelor of Science in Computer Science

CGPA: 3.39/4.00 — Foundation in software engineering, databases, algorithms, web development, computer systems and object-oriented programming.

ADDITIONAL INFORMATION

Based in Dubai, UAE — 5 years of frontend development experience — Bachelor of Science in Computer Science — Open to onsite, hybrid and remote opportunities — Languages: English and Urdu — Experienced with Agile/Scrum, UX/UI collaboration, Git branching, pull requests, peer reviews, mentoring, stakeholder communication and end-to-end frontend ownership. Completed AWS Developer Associate course covering cloud application development, monitoring, deployment and CI/CD.
